

# Middle School Advisory Program

In the Middle School, all students participate in the Advisory Program, which takes place each morning with a grade level teacher and a small group of students. We use the IB Learner Profile traits and individual student interests to guide Advisory activities. The Advisory Program offers students time to reflect on their approaches to learning, to foster international mindedness, build a caring and cooperative environment, and to develop positive relationships with teachers and students. The Advisor plays a central role in having oversight of the pastoral and academic welfare of advisees under their care, and acts as a reliable and visible first point of contact for advisees, their teachers and their parents.
